Alt-Haarener Str. 2., Aachen, Germany, 52080

I've used Microsoft Excel for my work using built-in functions to ease my life. After a while I used VBA to speed up processes and to automate them. Until 2017 I just use VBA and Excel besides my daily tasks. In 2017 I attended to a Java course in Malta. It was a starter course but was enough to make me change my carrier. Since then I built some desktop app with Java, rebuilt a website etc. Now I'd like to be a full-time developer.

Experience

Freelancer Electrician own,
Budapest (Hungary)

Jun 2007 - Present

Apr 2005 - Nov 2007
